h 09:30 AM - 05:30 PM

The international workshop investigates the relationship between Protected Areas (PAs) and human settlements, with specific reference to urban areas. Due to the progressive spreading of land-take processes and to the intense growth of PAs, today in Europe PA policies are increasingly confronted by urbanization processes. An alliance between PAs and "Cities", as challenging as it may be, is thus needed, both in favour of PAs and urban contexts.
